Project Synopsis :

ALUMNI PORTAL

Bachelor of Computer Application

Guide :

Prof. Praveen Tilavalli

Prepared by:

Prajwal Itnal – U26YN23S0045

Juned Fatthekhan - U26YN23S0051

Deepa Lakkappagol - U26YN23S0362

Introduction

Introduction:

it is a web-based platform that
connects alumni, students,
and the institution.
It enables interaction, mentorship,
job sharing, and participation in events
and reunions through
a centralized system.

Objectives

Objectives:

- To develop a centralized alumni management system.
- To enable secure registration and login for alumni and students.
- To provide mentorship and career guidance to students.
- To facilitate job and internship postings by alumni.
- To manage alumni events, reunions, and job opportunities

Existing System

- Manual record maintenance of alumni data.
- Lack of communication between alumni and students.
- No centralized system for events and job updates.
- Limited access to alumni achievements and mentorship.
- There is no centralized system to track the status of student after completion of degree.
- Students are struggle to find mentorship, internship guidance and job refferals.

Proposed System

- ✓ Secure login ,user authentication and Networking
- ✓ Job and internship posting facility
- ✓ Event management and notifications
- ✓ Tracking the status of student after completion of their degree

Modules and project's category

Mainly there are 3 Modules

Alumni ,Student ,Admin

- User Authentication
- Alumni Management
- Student Interaction
- Job & Internship Management
- Events & Reunion Management
- Mentorship System
- Notification System

Project Category:

It is a web-based academic project

Structure of Module

Modules of Alumni Portal System

Admin Module

- Manage Students
- Convert to Alumni
- Monitor Activities
- Manage Events

Student Module

- View Jobs & Internships
- Request Mentorship
- Update Profile
- View Events

Alumni Module

- Post Jobs & Internships
- Accept Mentorships
- Share Achievements
- Participate in Events

Tools / Platform, Hardware and Software Requirements Specifications

- **Tools / Platform:**

  Python (Django), HTML, CSS, PyCharm IDE, and MySQL (XAMPP).
- **Hardware Requirements:**

  Minimum 4–8GB RAM, 500GB HDD, Intel i3 or above.
- **Software Requirements:**

  OS :- Windows

  Programming language:- Python,

  Framework :- Django

  PyCharm (IDE) and for database MySQL (XAMPP).

Conclusion

- The Alumni Connect Portal strengthens alumni relationships through a centralized digital platform.
- It integrates mentorship, job opportunities, events, and communication, demonstrating how modern web technologies can effectively solve real-world institutional challenges.

Thank You
